

ProAdapt Universal 2-Slot USB-C Desktop Charging Cradle

The ProAdapt universal 2-slot charging cradle offers a flexible charging solution for businesses using different USB-C smartphones and mobile computers.

Its adjustable design fits devices of different sizes and shapes, with different charging port positions. Both slots can be adjusted independently, allowing different brands and models to be charged in the same cradle.

One Cradle. Different Devices.

- Fits a wide range of devices:** The ProAdapt 2-slot charging cradle accommodates a wide range of USB-C smartphones and mobile computers, with or without protective cases. Its adjustable design fits devices of different shapes and sizes from multiple brands.
- Fits different case thicknesses:** A recessed adjustment point allows the USB-C connector height to be fine-tuned to the charging port depth for use with protective cases and ruggedized corner bumpers. The adjustable design helps minimize pressure on both the device and the USB-C connector during insertion and removal.
- For mixed or single-OEM fleets:** The ProAdapt universal desktop charging cradle accommodates devices with an overall width of 55–90 mm and thickness of 7–24 mm, including any protective case.
- Firm and stable fit:** The side supports adjust left and right to accommodate centered and off-center charging ports, while the back support adjusts for a secure hold. Adjustment wheels allow tool-free positioning and tightening of the supports. An Allen screw version is also available to help prevent unwanted repositioning.
- Simplified power:** One power connection powers the charging cradle evenly on both USB-C connectors. Power supply sold separately. Charging only, no data transfer.
- Compact design:** Weight 1833 g. Dimensions 160x79x145 mm (W x H x D).
- Made in Sweden:** Designed and manufactured by Brodit. Made of high-grade ABS & acetal. Color: Black. Patent pending.
